

## WHAT ARE YOUR IDEAS FOR THE FUTURE OF AUBURN?

**Great cities and towns don't happen by accident.** Auburn is a great place to live, work, and play because of the efforts of its citizens.

Join us for the first in a series of public meetings on the future of Auburn. CompPlan 2030 will focus on how we use the land, now and in the future; on how land use and the built environment affect the natural world, and vice-versa; on schools, parks, and other facilities that form the civic foundation of the City; and on the many forms of transportation that link everything together.

The meeting will begin with a presentation, followed by breakout groups in which citizens will be able to offer input on this comprehensive plan for Auburn's future.

October 13 at 6:00pm | Auburn Junior High School 332 East Samford Ave
